A dynamic and hands-on Full-Stack developer with over 4 years of experience in backend and frontend technologies, I specialize in creating robust server environments using Linux and Nginx, and developing efficient APIs for seamless application integration. My strength lies in my ability to quickly interpret documentation and build the necessary features for robust performance. While backend development is my main expertise, I am also skilled in front-end development, allowing me to contribute effectively to full-stack projects.

EXPERIENCE

MIDLEVEL BACKEND DEVELOPER

Aéza.net

2023-MAY 2024-OCTOBER

- Led the creation of AEZA's Telegram bot, focusing on security and reliability through multiple API integrations and transaction mechanisms, improving system consistency.
- Developed a dedicated service for the bot, utilizing Nutgram and modern web development frameworks to enhance functionality and enable seamless integration with payment systems.
- Enabled secure transaction processing by connecting the bot to various payment gateways, enhancing user experience and financial operations
- Contributed to the strategic planning and execution of code migrations, ensuring the Telegram bot's compatibility with upcoming system updates. This proactive approach minimized potential service interruptions and safeguarded against technological obsolescence.
- Worked with teams to address user feedback, refining the bot and documentation to meet customer needs and adapt to new technology trends.
- Implemented a comprehensive disaster recovery system to ensure operational continuity during crises, significantly enhancing the bot's resilience and reliability under adverse conditions. This strategic initiative guaranteed uninterrupted service and reliability, reinforcing our commitment to maintaining high availability and security.

JUNIOR BACKEND DEVELOPER

Shid Almas Samin

2021 2022

- Served as a Junior Backend Developer at Shid Almas Samin, contributing to the development of a major marketplace platform with diverse functionalities.
- Involved in the integration and support of several key services: FileVendor for efficient file management, an administrative management system, a reseller platform, a user-engagement comments system, warehouse management for inventory control, and a comprehensive store feature.

LANGUAGE SKILLS

English : Fluent (Used extensively for communication within a multicultural team in my most recent role, facilitating collaboration and project management across team members).

Persian : Mother Tongue

EDUCATION

BACHELOR OF SCIENCE IN COMPUTER ENGINEERING (IN PROGRESS)

Noshirvani University of Technology

2019 – current

- Specialized in developing applications using IoT and cloud technologies, focusing on practical, real-world projects to enhance learning and application skills.
- Engaged with machine learning tools, applying theoretical knowledge to develop intelligent systems and predictive models.
- Conducted projects in machine vision, exploring image recognition and processing techniques to solve complex problems and implement innovative solutions.

SKILLS

- RESTful API Development
- Automation
- Security and Authentication
- Database Schema Design
- Agile/Scrum Methodologies
- Version Control/Git
- Performance Optimization
- Cross-Team Collaboration
- Cloud Computing
- Relational databases
- Web Server Management (litespeed,nginx)
- Networking and Security Protocols
- Debugging and Troubleshooting
- Object-Oriented Programming
- Microservices Architecture
- State Management

LANGUAGE AND FRAMEWORKS

- Java
 - PHP
 - Java Script
 - Spring Boot
 - TypeScript
 - Angular
 - Css & Html
 - Laravel
-
